Tender of Dating App : Real Date

In short : You're going to provide a whole stack of App creation service that from zero to complete (content of this PDF), then submission, release & handover, maintenance web hosting, etc.

This dating App is React Native for both of iOS and Android. Also, it needs a well presentable landing website where it can give link to connect mobile application. Splash Screen, UI/UX Design at all, multi-functionals, SEO in-build app, In-app Subscription, API integrates if that is apply, Powerful Backend Dashboard / Admin Panel in full control, Flash speed in operation, Low battery to the device as for long time App using, No bugs, No error, No Lag.

App Feature: 100% Real User by manual identity control, Strictly Registration procedure ban all fake profile and potential frauds. Powerful Advance Search Filter, Referral system for spotlight, Event/active hosting, Zero Ads at all.

Target Market : Hong Kong Base

This Project is 3 months work time for you. And you must provide timetable or schedule for me that help to check progression. I suggest you should start with all Screens first. When we discussed all possible screens then go to next step of UI/UX, App functionalities, development and so on. Of course, you can let me know what the best procedure is. On the other hands, I will provide Logo, domain and documents of related term of service (English version only).

Payment : This is based on how App creating process going to make installment by millstones.

App Testing:

No matter how many fake/ bot profiles imported as for operate testing. You must delete all before my launch date.

Handover:

I might change Server that depends on what you are using. You will give me whole source code and files of my Dating app. Also, I will change Backend Dashboard / Admin panel that ID and password. Anything for my fully control that you shall executes without hesitation.

Maintenance : 6 months Free of charge on vulnerability fix and maintenance (Not adding large scale/new things). If there are issues of Upgrade / Modify, you could charge by case / hourly.

CAUTION : You are responsible at any cost about any additional job work that you should tell me in advance, but you regardless just don't. Means I won't pay for extra cost, and you ought to cover that instead.

Tender of Dating App : Real Date

Modules

React Native iOS & Android App

Powerful Web based Admin panel / Backend Dashboard can control both of iOS & Android system at the same time.

3-5 pages landing website which also adaptive on any mobile devices.

Platforms on Android (Phones and Tablets) and iOS (iphone and ipad).

The App theme of interface should be clean, high-end, eyes catching. UI/UX Design must user-friendly and fashionable. On the other hands, as to the Identity Verification part in Backend Dashboard / Admin Panel Control, it should be designed in a second for me to judge the user account opening for Reject or Approve that by 1-2 clicks. Also, it must have an optionally multiple and select all by manageable interface. Moreover, it ought to be able to allow dozen admin accounts login for control, such as doing verify accounts at the same time in which it will not cause delay, duplicate, or bug. I don't mind to use third party APIs / Platform to achieve that.

In addition, CEO/Admin Announce System that can easily publish things to everyone in their Message box. Furthermore, mark user as admin or special from admin panel, so once I send message to any users then they will show one badge or any symbol that tells user this is special person or admin or Founder, CEO, etc. Besides, don't add any encryption on all users' messages since I need to access messages box and able to read all. In which that I can review all reporting by user to user.

Two languages : Traditional Chinese and English ;

Currency is HKD and USD.

If would be great if both of language and Currency can auto change by user selection or current location.

Register by Identity Verification (The level just like open Virtual Banking Account) : This part has to be well encrypted and notice to user. Register by Connect with Gmail account or by iCloud ID mail. During the Register process, it only requires about

- ◆ Screen 1 : Name + Gender (Male, Female, Other)+ D.O.B.. (Notice user all of that cannot be changed).
- ◆ Screen 2 : Must upload at least one photo with clear face (8 is Max). The very first photo will be considered as the profile photo.
- ◆ Screen 3 : Take photo of ID or Passport.
- ◆ Screen 4 : Selfie (NOT import image from device or anywhere) with front camera.
- ◆ Screen 5 : Selfie with holding with ID or Passport (NOT import image from device or anywhere) with front camera.
- ◆ Screen 6 : Selfie with a designed position (ready at least 5 positions with written descriptions at random on the screen.)
- ◆ Screen 7 : Notice user approval procedure of account verification might take 7 working days.
- ◆ Screen 8 : Get into Home page which is "Discovery".

✧ Login by Connect with Gmail account or by Apple account.

Tender of Dating App : Real Date

All unverified users WILL NOT / UNABLE to use Message Box function (Still can use the Send Message Request) until account verified by Admin.

Settings

Continuous Offline / Not in-use the app within three months that would automatically deactivation of user profile. No matter how, it won't be search or appear in anyways unless the user login their account again. Besides, every month system will pop up a message to remind user that gone for a while, come back and meet new friends.

Account deletion (Completely delete).

In-App Subscription.

Reports, Block users, etc.

Push Notifications

Contact

And something you think is necessary.

Bottom Navigation bar: Feeds, Search, Discovery, Message, Profile.

Below are important pages (I'm not sure should I called them "page") that I can thought to as a layman :

Splash Screen : Of course, you design it.

Landing page : Register / Login

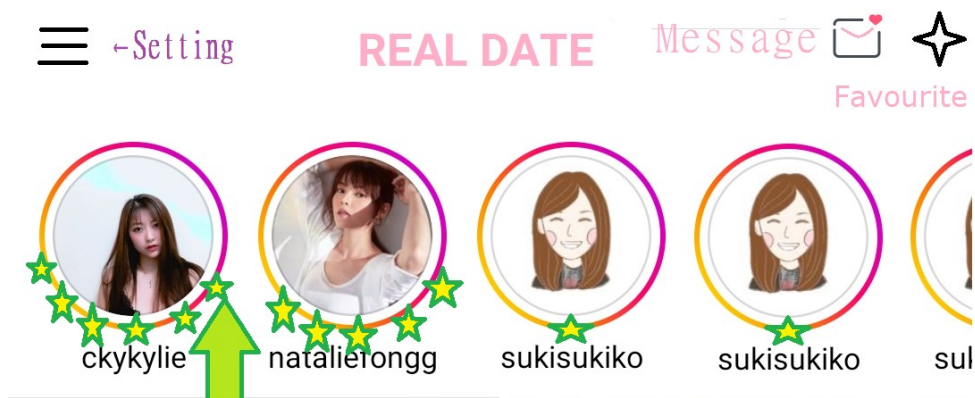

Discovery page

Which is Main page, the profile of result will appear by Online users within Basic Filters has applied only.

Both of swipe left & swipe right for seeing more pictures (Looping).

Symbol of LOVE means LIKE ; Symbol of EYES CLOSED (You can recommend me other symbol) means DISLIKE.

Tender of Dating App : Real Date

Basic profile informations & About

Tender of Dating App : Real Date

User daily limited 120 times for LOVE; User has no limit for getting LOVE (Like).

No limit for EYES CLOSED (Dislike); Besides, that user will get notification of reminder automatically for profile image improvement if got 300 times of EYES CLOSED.

Rewind (Means back) for the last move during swiping (no matter is EYES CLOSED or LOVE).

Gamification (you design the best presentation) for matching succeed. When both side of matching happens, user can engage in seamless conversation.

After user A click LOVE button on user B, then user A will automatically save user B as favorited. User A will see user B's post on Feeds. This also apply single way to click LOVE or both LOVE each other. Besides, Discovery page doesn't have button of Send Message Request.

Send Message Request : User can send Message Request only working on one way to LOVE another. Means they are haven't matched yet.

Favorited page

There is one page for a List of Favorited with a button of Send Friend Request. And one page for a List of Request Received for acceptancy.

Feeds page

Which is always show the latest Posts from Favorited users. Pull down for refresh the latest. User on Post action can Like, Comment (everyone can single reply to the post), and Share. Buttons are Profile Liked showing, Users number liked showing, etc. Just like the Instagram.

Regard to the Share, the post aim to share out to other platforms as for more publicity of this Dating App. At least it has Post of link copy. If it came from API integrates then you ought to drop down useless platform/channel, ie. E-mail. About content sharing should have image / video of the post & content from the post and my Dating App information. What if someone doesn't install my Dating App, it should be redirect to App store or Play Store.

Search

Which is searching for criterial conditions by user who entered data on their preferences. And it is remembering the setting even user close App & relogging. You might need to set default by user current location (Radius 100km) if user Clear All Filters or hasn't set any Matching Filters.

There are two classes to search : Basic Matching Filter and Advance Matching Filter. The search result is always applied from both Filters. Also, every time refresh the result at same conditions that will show different ordering. There is scenario happens in other dating apps a lots, which is somehow user appear quite often at front, some user just doesn't; reflash doesn't update, etc. So, you must code it base on the filters priority with randomly appear with equal opportunity to all users.

Furthermore, there are two presentation ways of outcome : Map viewing and Card style viewing. By click the user icon on Map viewing and Card style viewing, both types will pop-up that user profile for viewing. User can add target user as Favorite and send friend request inside the profile of pop-up.

If there's no filters result of profile, then remind user loose their filter criteria then search again.

Tender of Dating App : Real Date

Once user apply using the Advance Matching Filter, the result happens run out of profiles then recommend profiles in behind from Basic Matching Filter that enquire user approval first. Set dividing line after Advance Matching Filter.

Two types of Filters

Basic Matching Filter :

Filter details: Distance, Gender, Age (There is limited to user selection no matching to 5 years younger than self ; 8 years older than self.), Height, Weight. Results present way alike pinterest card style viewing.

Advance Matching Filter :

Filter details: New Join (Within 30 days), Age (No limitation), Eyes color, Hair natural color, Skin color, Constellation, Blood type, Ethnicity, Religion, Nation, Languages, Qualification, Looking for what kind of relationships, Living with, Child, Pet, Work Industry, Income, Property, Immigration, Drink, Smoke, Status, etc (please advise me some).

It needs In-App Subscription (HKD69 monthly auto renew) to unlock. Three days trial period for refund Guaranteed.

Message page : similar with Whatsapp' basic functions would be great. Do NOT encrypt on whole Message function. Search field for username and content. Send words, symbols, emoji, image, video, files, real time location, current location, online calling, video calling, reply message, delete both side messages within limited 10mins. Addition, User Chatting List and List of users who has chatted in past.

Profile Icon

It is coming from the first place of Profile image. Also, user is required to has at least one photo. Total 8 images in Max can be drag and move for ordering. The first-place image can edit to be profile icon. Cannot upload clip. Profile icon upload or change that must needs algorithm to detect it is human, not any natural, animal, object, plain color, cartoon, etc. images. Verification approval and get it by push notification.

User Profile Management (Assumes 553,000 people parameter market in Hong Kong)

About; User Post Wall (200 words, 4 images, 10 sec clip; No hyperlink.); Matching selection Details : Same content with two types of Filters; Edit profile; Have visitor viewing; Favorite & Send Message request button from other user angle to view, etc.

User profile details are Confidential. So, those details are optional hide and visible to other users. Hidden detail of profile items will NOT be searched neither basic or advanced filters.

Visitors action on user profile Wall

They can Like, Comment (everyone can single reply to the post), Share (Same function regard to Feeds page.).

Tender of Dating App : Real Date

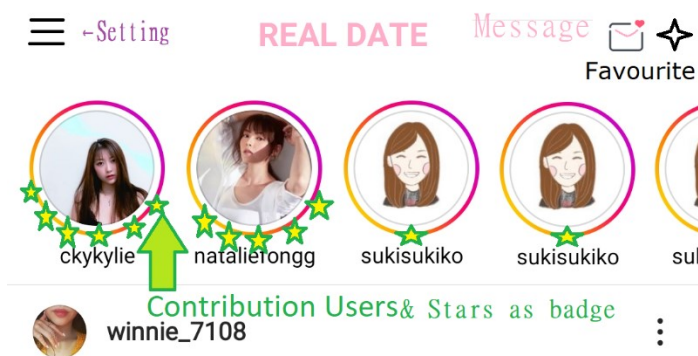

Contribution User Advantage System

Contribution User profile exposure on the Top-head of "Discovery" and "Feeds". Presentation alike Instagram's Story circle icon. Contribution ranking is based on via App sharing and there's no maximum limit (There's no needs to use referral code.). Every new user Register successfully via share link that it would automatically count on the sharer at accumulating for permanently.

On the other hands, it would have badges level to indicate on contributor profile icon.

Level examples: 1-10 people get a star, 11-50 people get two stars, 51-100 people get three stars and so on. Fill start until complete the profile icon to fully circle around.

Besides, it is decrement order and ordering by recently if users are getting same people quantity. Once user click the Contribution User then their profile will pop-up (the rest happens same as Map viewing and Card style viewing).

Bottom as to Navigation bar and Contribution User on Feed page illustration. ↑

Tender of Dating App : Real Date

Google Map Integration :

No need to keep GPS all the time, only when users use related functions. It will be wonderful if it can be managed to close GPS on background service once turnoff that functions.

Status of ONLINE

Status of OFFLINE

Status of OFFLINE

Users Online and Offline illustration. ↑

Event

This is only for Subscribed user to host any kind of activity/event. Basic requirements for host ought to input Start and End of Date with Time, or Not Specific, Location, Nature of activity/event, Description, Limited number of people, Cost.

Other users can choose Joined and interested. Show the numbers for that. Both of Host and participants can Direct Message (Skip the step of Send Friend Request). Events ought to have Ordering by Starting Date, Ending Date, The latest created.

Tender of Dating App : Real Date

Push notification selection :

Visitors, Message, Like, comment, Feeds, LOVE, Call (4G or up) and Video call (4G or up; 1080P). Send Request, Accept Request, Reject Request, account approved, account rejected, profile approved, profile Rejected, Who visited me, etc.

Message Chat Box: I don't mind you integrate with third party APIs, as long as it is high valuable.

Pin/Star Chat box on Three profiles. Cannot send clip/video!

Unlimited to allow all Languages wording and Symbols, emoji, Images and Hyperlink.

Unlimited to Voice message which 1 minute per time.

Real-time and current/pin location sharing.

Message reply supported. Messages react supported. Time of the message.

Allow to delete messages within 10 mins. Also, it will not appear message for deletion in both sides.

Support Search in messages.

CEO/System chat box to everyone.

Camera shifting front or back-sides; Mute or unmute sound.

Welcome to inquire and discuss with me about this Dating App

Kindly make your Bidding Offer to me before 18 September 2022. Thank you.
